

Rotary actuator fail-safe for adjusting dampers in technical building installations

- Air damper size up to approx. 6 m²
- Torque motor 30 Nm
- Nominal voltage AC/DC 24 V
- Control Open/close
- with 2 integrated auxiliary switches

Technical data

Electrical data	Nominal voltage	AC/DC 24 V
	Nominal voltage frequency	50/60 Hz
	Nominal voltage range	AC 19.2...28.8 V / DC 21.6...28.8 V
	Power consumption in operation	9.5 W
	Power consumption in rest position	4.5 W
	Power consumption for wire sizing	16 VA
	Auxiliary switch	2 x SPDT, 1 x 10% / 1 x 11...90%
	Switching capacity auxiliary switch	1 mA...3 A (0.5 A inductive), AC 250 V
	Connection supply / control	Cable 1 m, 2 x 0.75 mm ² (halogen-free)
	Connection auxiliary switch	Cable 1 m, 6 x 0.75 mm ² (halogen-free)
	Parallel operation	Yes (note the performance data)
Functional data	Torque motor	30 Nm
	Torque fail-safe	30 Nm
	Direction of motion motor	selectable by mounting L/R
	Direction of motion fail-safe	selectable by mounting L/R
	Manual override	by means of hand crank and locking switch
	Angle of rotation	Max. 95°
	Angle of rotation note	adjustable starting at 33% in 5% steps (with mechanical end stop)
	Running time motor	75 s / 90°
	Running time fail-safe	<20 s @ -20...50°C / <60 s @ -30°C
	Sound power level, motor	56 dB(A)
	Sound power level, fail-safe	71 dB(A)
Mechanical interface	Universal shaft clamp 12...26.7 mm	
Position indication	Mechanical	
Service life	Min. 60'000 fail-safe positions	
Safety data	Protection class IEC/EN	III, Safety Extra-Low Voltage (SELV)
	Protection class auxiliary switch IEC/EN	II, reinforced insulation
	Degree of protection IEC/EN	IP54
	EMC	CE according to 2014/30/EU
	Low voltage directive	CE according to 2014/35/EU
	Certification IEC/EN	IEC/EN 60730-1 and IEC/EN 60730-2-14
	Mode of operation	Type 1.AA.B
	Rated impulse voltage supply / control	0.8 kV
	Rated impulse voltage auxiliary switch	2.5 kV
	Pollution degree	3
	Ambient humidity	Max. 95% RH, non-condensing
	Ambient temperature	-30...50°C [-22...122°F]
	Storage temperature	-40...80°C [-40...176°F]

Safety data	Servicing	maintenance-free
Weight	Weight	4.7 kg

Safety notes

- This device has been designed for use in stationary heating, ventilation and air-conditioning systems and must not be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.
- Outdoor application: only possible in case that no (sea) water, snow, ice, insulation or aggressive gases interfere directly with the device and that it is ensured that the ambient conditions remain within the thresholds according to the data sheet at any time.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied during installation.
- The device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- Cables must not be removed from the device.
- To calculate the torque required, the specifications supplied by the damper manufacturers concerning the cross-section, the design, the installation situation and the ventilation conditions must be observed.
- The two switches integrated in the actuator are to be operated either on power supply voltage or at safety extra-low voltage. The combination power supply voltage/safety extra-low voltage is not permitted.
- The device contains electrical and electronic components and must not be disposed of as household refuse. All locally valid regulations and requirements must be observed.

Product features

Mode of operation	The actuator moves the damper to the operating position at the same time as tensioning the return spring. The damper is turned back to the safety position by spring energy when the supply voltage is interrupted.
Simple direct mounting	Simple direct mounting on the damper shaft with a universal shaft clamp, supplied with an anti-rotation device to prevent the actuator from rotating.
Shaft stabiliser	The shaft clamp of the spring-return actuator is factory-equipped with a shaft stabiliser for the stabilisation of the combination of damper, damper shaft and actuator. This is comprised of two plastic support rings and must be left in place, partially, or completely removed, depending on the installation situation and the shaft diameter.
Manual override	By using the hand crank the damper can be actuated manually and engaged with the locking switch at any position. Unlocking is carried out manually or automatically by applying the operating voltage.
Adjustable angle of rotation	Adjustable angle of rotation with mechanical end stops.
High functional reliability	The actuator is overload protected, requires no limit switches and automatically stops when the end stop is reached.
Flexible signalling	The actuator has one auxiliary switch with a fixed setting and one adjustable auxiliary switch. They permit a 10% or 11...90% angle of rotation to be signaled.

Accessories

Mechanical accessories	Description	Type
	End stop indicator	IND-EFB
	Shaft clamp reversible, clamping range Ø12...26.7 mm	K9-2
	Damper crank arm Slot width 8.2 mm, clamping range Ø14...25 mm	KH10
	Actuator arm Slot width 8.2 mm	KH-EFB
	Mounting kit for linkage operation for flat and side installation	ZG-EFB
	Anti-rotation mechanism 230 mm, Multipack 20 pcs.	Z-ARS230
	Hand crank 63 mm	ZKN2-B

Electrical installation

Supply from isolating transformer.

Parallel connection of other actuators possible. Observe the performance data.

Wiring diagrams

AC/DC 24 V, open/close

Cable colours:

- S6 = grey

Operating controls and indicators

Auxiliary switch settings

Note: Perform settings on the actuator only in deenergised state.

For the auxiliary switch position settings, carry out points **1** to **7** successively.

- 1 Manual override**
Turn the hand crank until the desired switching position is set.
- 2 Shaft clamp**
Edge line **A** displays the desired switching position of the actuator on the scale.
- 3 Fasten the locking device**
Turn the locking switch to the „Locked padlock“ symbol.
- 4 Auxiliary switch**
Turn rotary knob until the notch points to the arrow symbol.
- 5 Unlock the locking device**
Turn the locking switch to the „Unlocked padlock“ symbol or unlock with the hand crank.
- 6 Cable**
Connect continuity tester to S4 + S5 or to S4 + S6.
- 7 Manual override**
Turn the hand crank until the desired switching position is set and check whether the continuity tester shows the switching point.

Installation notes

The shaft stabiliser must nevertheless be used with installation of the anti-rotation device on the opposite side of the shaft clamp and a shaft diameter <20 mm.

Shaft stabiliser long shaft mounting

- In the case of long shaft installation the use of the shaft stabiliser at a shaft diameter of
 - 12...20 mm is necessary
 - 21...26.7 mm is not necessary and can be removed

Shaft stabiliser short shaft mounting

In the case of short shaft installation, the necessity of the shaft stabiliser is dispensed with. It can be removed or – if the shaft length permits this – left in the shaft clamp.
