FOR IMMEDIATE RELEASE
January 30, 2017

NEW BELIMO ZONETIGHT™ ZONE VALVES NOW OFFER SWEAT CONNECTION

Danbury, CT, January 30, 2017 – Belimo Americas announces the release of the new QCV ZoneTight zone valves with sweat connection designed and engineered for maximum efficiency in tight spaces. The QCV zone valves are suited for commercial buildings where higher close-off and the ability to change flow is desired.

- Zero leakage, true ball valve design eliminates energy losses and is resistant to clogging
- Low power consumption - up to 95% less than conventional zone valves
- Field adjustable flow to meet your design requirements
- Easy retrofit replacement solution
- 5-year warranty

“This new zone valve with sweat connection offers a reliable, energy efficient solution for the OEM and contracting market. “While the valves are preset at the factory, they are field adjustable allowing you to alter the pressure to meet your needs, unlike any other zone valve on the market today,” states Nigel Gallimore, Product Manager.

Common applications include unit ventilators, fan coil units, VAV reheat coils, fin tube, and radiant panels. The QCV fits in space restricted areas and can be assembled without the use of tools.

###

Belimo is the global market leader in the development, production, and marketing of field device solutions for controlling heating, ventilation and air conditioning systems. Actuators, control valves, and sensors make up the company’s core business. Known for its direct-coupled actuator and innovations in pressure independent control valve technology, Belimo has solutions to maintain an efficient building environment. For 40 years, Belimo has provided innovations in Comfort, Energy Efficiency and Safety Solutions to customers throughout the world, all of which are backed by Belimo’s unsurpassed 5-year warranty.
