Press Release BELIMO U.S., Inc.

Belimo's FSKN Remote Testing Module Wins AHR 2027 Innovation Award

Belimo, a global leader in damper actuators, control valves, sensors, and meters, will be awarded an Innovation Award in the Tools & Instruments category at AHR 2027 for its FSKN Remote Testing Module. The Innovation Awards honor groundbreaking products, systems, and technologies in the HVACR industry, highlighting creative, real-world applications and market impacts.

Belimo's FSKN Remote Inspection Module is a simple, cost-effective solution for periodic life safety damper testing. The FSKN initiates damper cycling, verifies damper position, and delivers digitally documented pass/fail results to a computer, tablet or smartphone. Integrating seamlessly with Fire Control Panels (FCP) or the Building Management System (BMS) using BACnet or Modbus, the FSKN is designed to meet periodic testing requirements of NFPA 80 and NFPA 105.

"The FSKN Remote Inspection Module represents the kind of innovation we strive for at Belimo: technology that makes buildings smarter, safer, and more efficient," said Mark Armon, Belimo Product Manager. "By enabling remote testing, the FSKN Remote Testing Module significantly reduces inspection time, labor requirements, and disruptions to daily operations. This helps organizations improve efficiency and lower costs while maintaining compliance."

The FSKN is poised to shape the future of periodic damper inspection and life safety compliance by accelerating the industry's shift from manual, labor-intensive processes to intelligent, connected building technologies. By enabling remote testing, real-time system visibility, and automated digital documentation through BACnet and Modbus connectivity, FSKN establishes a new standard for how fire and smoke dampers are monitored, inspected, and maintained.

From actuation and control to remote testing and digital documentation, Belimo's complete fire and smoke portfolio provides an integrated approach to life safety damper applications. Whether specified for a new building or incorporated into an existing facility as part of a retrofit, Belimo solutions help simplify installation, testing, and ongoing management while supporting safer, more efficient building operation.

The Belimo Group is the global market leader in the development, production, and sales of field devices for the energy-efficient control of heating, ventilation and air conditioning systems. The focus of our core business is on damper actuators, control valves, sensors and meters. In 2025, the Company reported sales of CHF 1.121 billion and currently employs over 2,800 people worldwide. Information about the Company and its products is available at www.belimo.com. The shares of BELIMO Holding AG have been traded on the SIX Swiss Exchange since 1995 (BEAN).
