New Digital Generation
GM 360 in-lb Damper Actuator

Innovative IP65 electrical interfaces
- Cable
- Terminal
- Field replaceable

Intuitive Configuration
with Belimo Assistant 2

LED indicator
- Device status
- Visible from all angles
- Can be turned off via Belimo Assistant 2

Low Power Consumption
0.5 W at rest,
2 W in operation

Noise reduction
Silent gear train design
and interface

Mounting
- Same mounting points
- Similar overall dimensions

- Belimo's New Digital Generation of actuators are introduced by the GM, the benchmark 360 in-lb non fail-safe damper actuator. With the latest in Belimo technology, the GM Damper Actuator features NFC connectivity, field-replaceable cables and terminal blocks for convenient handling, LED indicators for instant system status visibility, and low-noise operation. Together, these features enhance performance, improve usability, and streamline commissioning. An 80% reduction in power consumption reduces operating costs and supports sustainability objectives, and NFC-enabled on-site configuration via the free Belimo Assistant 2 app means that installation and commissioning is faster, simpler, and doesn't require any special training.
