Press Release of the Belimo Group

Belimo Strengthens Global Data Center Strategy with New Experience Center in the Americas

New interactive space gives customers a rare opportunity to experience mission-critical cooling technologies through hands-on demonstrations and real-world applications

Danbury (Connecticut), October 20, 2026 – Belimo, a global leader in HVAC field devices, today announced the opening of a Data Center Experience Center at its Belimo Americas regional headquarters in Danbury, Connecticut. The experience center represents the next step in Belimo's growing global network, following the opening of a similar space at its Singapore location and ahead of a planned Data Center Experience Center in the United Kingdom. Together, these centers enable Belimo to support customers globally through hands-on learning, collaboration, and the sharing of application expertise.

The expanding network of Data Center Experience Centers reflects that Belimo is committed to staying close to customers while investing in expertise, innovation, and engagement worldwide. These centers serve as hubs for knowledge sharing, helping customers better understand the cooling technologies and control strategies that support modern, mission-critical digital infrastructure.

"Many of the technologies that are critical to data center performance are difficult to see in operation because access to operational facilities is limited," said Sarah Bencic, President, Belimo Americas. "The Data Center Experience Center was created to bridge this gap by providing a place for our partners to learn, collaborate, and better understand how innovative cooling solutions and control strategies support reliable, scalable, and efficient operations."

Through guided tours and live demonstrations, visitors to the space can explore real-world installations, observe equipment in operation, and gain practical insight into how products, controls, and system-level strategies influence system responsiveness, operational visibility, and overall data center performance.

Customers interested in learning more about the Belimo Data Center Experience Center or scheduling a tour are invited to visit **belimo.com/datacenters**.

The Belimo Group is a global market leader in the development, production, and sales of field devices for the energy-efficient control of heating, ventilation, and air conditioning systems. The focus of its core business is on damper actuators, control valves, and sensors and meters. In 2025, the Company reported sales of CHF 1,121 million and over 2,800 employees. Information about the Company and its products is available at www.belimo.com. The shares of BELIMO Holding AG have been traded on the SIX Swiss Exchange since 1995 (BEAN).
