

PRESS RELEASE

09. February 2026 – Hinwil, Switzerland

Belimo at MCE 2026: Building today for tomorrow.

At MCE 2026, Belimo introduces a new generation of field devices and digital solutions designed to help building owners, system integrators, and facility managers reduce energy consumption by up to 55%, lower CO₂ emissions, and future-proof their infrastructure. As regulatory requirements tighten and resources such as budget, time, and skilled labour become increasingly limited, Belimo delivers technologies that simplify installation, enhance operational efficiency, and enable seamless digital integration across the entire HVAC life cycle.

The goal of this year's presence at MCE is to demonstrate to visitors a product portfolio that supports every aspect of HVAC performance. In line with the Belimo show theme 'Building today for tomorrow', the company presents products which address current industry requirements as well as anticipates future needs, allowing customers to be one step ahead of the curve, for example by using communicative product capabilities.

The Belimo MCE 2026 booth features key applications of HVAC field devices, along with a section on data centres to address a growing market segment for the industry.

- **Sensors and Meters**

Reliable measurement and monitoring solutions that integrate effortlessly into building automation systems.

- **Room Comfort and Safety**

Precise control of temperature, humidity, and air quality through sensors, actuators, volumetric flow controllers, and fire dampers for enhanced well-being and protection.

- **Water and Flow Control**

Innovative valve technologies—including the IoT-enabled Belimo Energy Valve™ and intelligent butterfly valves—optimise flow control, reduce inefficiencies, and improve system performance.

- **Data Centres**

High-reliability actuators, valves, and sensors ensure uninterrupted uptime, efficient cooling, and growing support for advanced liquid cooling demands.

- **Refrigeration**

New Belimo xBALL refrigeration valves deliver maximum efficiency, safety, and reliability, including compatibility with flammable refrigerants.

Belimo exhibits in hall 7, booth A01/09.

The Belimo Group is the global market leader in the development, production, and sales of field devices for the energy-efficient control of heating, ventilation, and air-conditioning systems. Its core business focuses on damper actuators, control valves, sensors and meters. In 2024, the Company reported sales of CHF 944 million and over 2'300 employees. Information about the Company and its products is available at www.belimo.com. The shares of BELIMO Holding AG have been traded on the SIX Swiss Exchange since 1995 (BEAN).
