

Potable water valve, 2-way, Internal thread

- For potable water applications
- NSF/ANSI 372 – Lead Free
- NSF/ANSI 61 – CLD 23 – Water Quality

Picture may differ from product

5-year warranty

## Type overview

Type	DN
B2200PW-S	50

## Technical data

	Functional data	
	Valve size [mm]	2" [50]
	Drinking water certificate	NSF/ANSI 61 NSF/ANSI 372
	Fluid	Potable water
	Fluid temperature	-4...212°F [-20...100°C]
	Body Pressure Rating	600 psi CWP
	Close-off pressure Δps	200 psi
	Leakage rate	0%
	Angle of rotation	90°
	Pipe connection	Internal thread NPT (female)
	Installation orientation	upright to horizontal (in relation to the spindle)
	Servicing	maintenance-free
	Flow Pattern	2-way
	Cv	206
	Materials	
	Valve body	Lead free brass
	Stem	Lead free brass
	Seat	PTFE
	O-ring	EPDM
	Ball	Chrome plated lead free brass
	Suitable actuators	
	Non Fail-Safe	ARB(X)
	Electronic fail-safe	AFRB(X)

## Safety notes

- The ball valve has to be exercised at least once a week, so that the quality of potable water as well as the functionality are not affected.
- The valve has been designed for use in stationary potable water systems and must not be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.
- The valve does not contain any parts that can be replaced or repaired by the user.

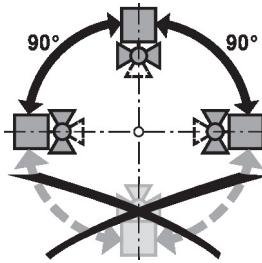

## Product features

<b>Operating mode</b>	The on/off ball valve is adjusted by a rotary actuator. The rotary actuator is controlled by an on/off signal. Open the ball valve counterclockwise and close it clockwise.
-----------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------

## Installation notes

<b>Notes</b>	The ball valve is a regulating device. To fulfil this control task in the long term, the circuit must be kept free from particle debris (e.g. welding beads during installation work).
--------------	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<b>Permissible installation orientation</b>	The ball valve can be installed upright to horizontal. The ball valve may not be installed in a hanging position, i.e. with the stem pointing downwards.
---------------------------------------------	----------------------------------------------------------------------------------------------------------------------------------------------------------

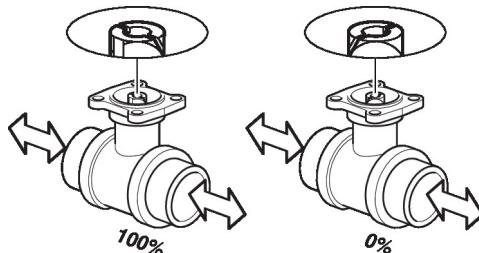

<b>Servicing</b>	Ball valves and rotary actuators are maintenance-free.
------------------	--------------------------------------------------------

Before any service work on the control element is carried out, it is essential to isolate the rotary actuator from the power supply (by unplugging the electrical cable if necessary). Any pumps in the part of the piping system concerned must also be switched off and the appropriate slide valves closed (allow all components to cool down first if necessary and always reduce the system pressure to ambient pressure level).

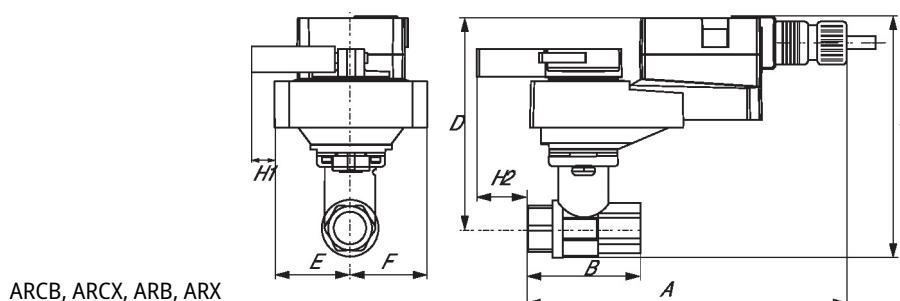

The system must not be returned to service until the ball valve and the rotary actuator have been correctly reassembled in accordance with the instructions and the pipeline has been refilled by professionally trained personnel.

<b>Flow direction</b>	Please also ensure that the ball is in the correct position (marking on the shaft).
-----------------------	-------------------------------------------------------------------------------------

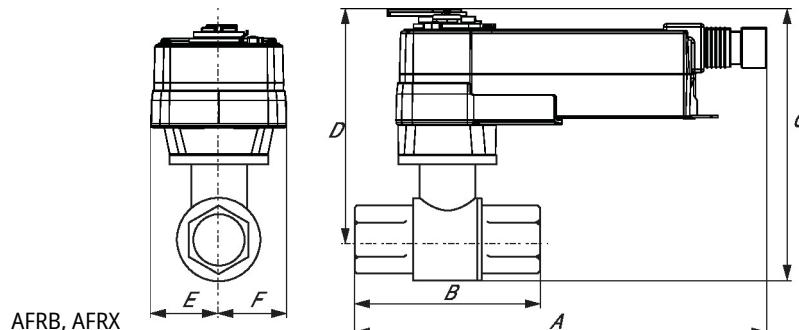

## Dimensions

Type	DN	Weight
B2200PW-S	50	5.8 lb [2.6 kg]

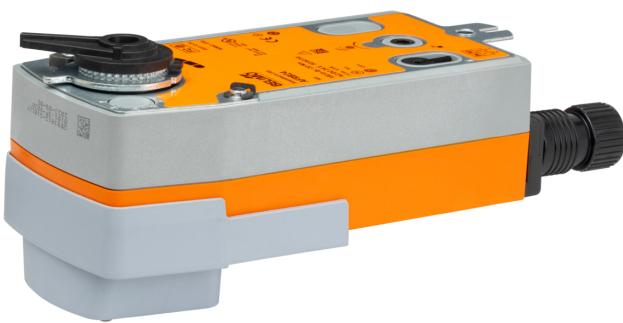

## Dimensions

A	B	C	D	E	F
8.82" [224]	4.9" [125]	7.5" [191]	5.9" [148.5]	1.8" [46]	1.8" [46]

A	B	C	D	E	F
10.9" [277]	4.9" [125]	8.0" [203]	6.3" [161]	2.0" [51]	2.0" [51]

On/Off, Spring return, 24 V

## Technical data

<b>Electrical data</b>	Nominal voltage	AC/DC 24 V
	Nominal voltage frequency	50/60 Hz
	Nominal voltage range	AC 19.2...28.8 V / DC 21.6...28.8 V
	Power consumption in operation	5 W
	Power consumption in rest position	2.5 W
	Transformer sizing	7.5 VA
	Electrical Connection	18 GA appliance cable, 3 ft [1 m], with 1/2" NPT conduit connector
	Overload Protection	electronic throughout 0...95° rotation
<b>Functional data</b>	Direction of motion motor	selectable by ccw/cw mounting
	Direction of motion fail-safe	reversible with cw/ccw mounting
	Manual override	5 mm hex crank (3/16" Allen), supplied
	Angle of rotation	90°
	Running Time (Motor)	75 s / 90°
	Running time fail-safe	<20 s
	Noise level, motor	45 dB(A)
	Noise level, fail-safe	62 dB(A)
	Position indication	Mechanical
<b>Safety data</b>	Power source UL	Class 2 Supply
	Degree of protection IEC/EN	IP54
	Degree of protection NEMA/UL	NEMA 2
	Enclosure	UL Enclosure Type 2
	Agency Listing	cULus acc. to UL60730-1A/-2-14, CAN/CSA E60730-1:02 CE acc. to 2014/30/EU and 2014/35/EU
	Quality Standard	ISO 9001
	UL 2043 Compliant	Suitable for use in air plenums per Section 300.22(C) of the NEC and Section 602 of the IMC
	Ambient humidity	Max. 95% RH, non-condensing
	Ambient temperature	-22...122°F [-30...50°C]
	Storage temperature	-40...176°F [-40...80°C]
	Servicing	maintenance-free
<b>Weight</b>	Weight	5.3 lb [2.4 kg]
<b>Materials</b>	Housing material	Galvanized steel and plastic housing

## Technical data

Footnotes <sup>t</sup>Rated Impulse Voltage 800V, Type of action 1.AA, Control Pollution Degree 3

## Electrical installation

 **INSTALLATION NOTES**

-  A Actuators with appliance cables are numbered.
-  1 Provide overload protection and disconnect as required.
-  3 Actuators may also be powered by DC 24 V.
-  45 Actuators may be powered in parallel. Power consumption must be observed.
-  48 Parallel wiring required for piggy-back applications.
-  Meets cULus requirements without the need of an electrical ground connection.
-  1 **Warning! Live electrical components!**  
During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.
