Electrical installation

INSTALLATION NOTES

1 Provide overload protection and disconnect as required.
3 Actuators may also be powered by DC 24 V.
5 Only connect common to negative (-) leg of control circuits.
7 A 500 Ω resistor (ZG-R01) converts the 4...20 mA control signal to 2...10 V.
8 Control signal may be pulsed from either the Hot (Source) or Common (Sink) 24 V line.
10 For triac sink the Common connection from the actuator must be connected to the Hot connection of the controller. Position feedback cannot be used with a triac sink controller; the actuator internal common reference is not compatible.
12 IN4004 or IN4007 diode. (IN4007 supplied, Belimo part number 40155).
16 Actuators are provided with a numbered screw terminal strip instead of a cable.
46 Actuators may be controlled in parallel. Current draw and input impedance must be observed.
47 Master-Slave wiring required for piggy-back applications. Feedback from Master to control input(s) of Slave(s).
Meets cULus requirements without the need of an electrical ground connection.

Electrical installation

Warning! Live electrical components!
