

Butterfly Valve with ANSI Class 150 Lug types

- Disc 316 stainless steel
- Bubble tight shut-off
- Teflon seat
- Valve face-to-face dimensions comply with API 609 & MSS-SP-67
- For use with dead-end service
- Completely assembled and tested, ready for installation

Type overview			
Гуре			DN
-6200-150SHP			200
echnical data			
	Functional data	Valve size [mm]	8" [200]
		Fluid	chilled or hot water, up to 60% glycol, steam
		Fluid Temp Range (water)	-22400°F [-30204°C]
		Body Pressure Rating	ANSI Class 150
		Flow characteristic	modified equal percentage, unidirectional
		Leakage rate	0%
		Pipe connection	Flange for use with ASME/ANSI class 150
		Servicing	maintenance-free
		Flow Pattern	2-way
		Controllable flow range	quarter turn, mechanically limited
		Cv	2064
		Maximum Inlet Pressure (Steam)	50 psi
		Maximum Velocity	32 FPS
		Lug threads	3/4-10 UNC
	Materials	Valve body	Carbon steel full lug (ASME B16.34)
		Stem	17-4 PH stainless steel
		Seat	RPTFE
		Bearing	glass backed PTFE
		Disc	316 stainless steel
	Suitable actuators	Non Fail-Safe	SY4

Safety notes

Electronic fail-safe

 WARNING: This product can expose you to lead which is known to the State of California to cause cancer and reproductive harm. For more information go to www.p65warnings.ca.gov

44 lb [20 kg]

Weight Weight

Technical data

Materials

Housing material	die cast aluminium
Gear train	high alloy steel gear sets, self locking

Product features

Application

SY Series actuators are fractional horsepower devices, and utilize full-wave power supplies. Observe wire sizing and transformer sizing requirements. Proportional models CANNOT be connected to Belimo direct coupled (AF, AM, GM...etc) actuator power supplies or any type of half-wave device. You MUST use a separate, dedicated transformer or power supply to power the SY actuator. Please do not connect other automation equipment to the dedicated SY supply source. You MUST use four wires (plus a ground) to control a proportional control SY actuator (See SY Wiring Section).

Accessories

Gateways	Description	Туре
	Gateway MP to BACnet MS/TP	UK24BAC
	Gateway MP to Modbus RTU	UK24MOD
	Gateway MP to LonWorks	UK24LON
Electrical accessories	Description	Туре
	Local electric disconnect for SY412 series actuator, AC 120 V, MFT	HOA-120VMFT
	Service tool, with ZIP-USB function, for programmable and	ZTH US
	communicative Belimo actuators, VAV controller and HVAC performance	
	devices	
	Battery backup system for SY46 series actuator, AC 120 V, on/off	EXT-NSV-B03-120
	Battery backup system for SY46 series actuator, AC 120 V, MFT	EXT-NSV-B04-120
	Battery backup system for SY45 series actuator, AC 24 V, on/off	EXT-NSV-B13-24
	Battery backup system for SY45 series actuator, AC 24 V, MFT	EXT-NSV-B14-24
Tools	Description	Туре
	Connecting cable 10 ft [3 m], A: RJ11 6/4 ZTH EU, B: 3-pin Weidmüller and supply connection	ZK4-GEN
	Service tool, with ZIP-USB function, for programmable and communicative Belimo actuators, VAV controller and HVAC performance devices	ZTH US

Electrical installation

X INSTALLATION NOTES

Do not change sensitivity or dip switch setting with power applied.

Power supply Common/Neutral and Control Signal "-"wiring to a common is prohibited. Terminals 4 and 6 need to be wired separately.

1 Isolation relays must be used in parallel connection of multiple actuators using a common control signal inputs. The relays should be DPDT.

🔬 Isolation relays are required in parallel applications. The reason parallel applications need isolation relays is that the motor uses two sets of windings, one for each direction. When one is energized to turn the actuator in a specific direction a voltage is generated in the other due to the magnetic field created from the first. It's called back EMF. This is not an issue with one actuator because the voltage generated in the second winding isn't connected to anything so there is no flow. On parallel applications without isolation, this EMF voltage energizes the winding it is connected to on the other actuators in the system, the actuators are tying to turn in both directions at once. The EMF voltage is always less than the supply voltage due to the resistance of the windings, so while the actuator still turns in the commanded direction, the drag from the other reduces the torque output and causes overheating.

Electrical installation

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.
