Electrical installation

☒ INSTALLATION NOTES

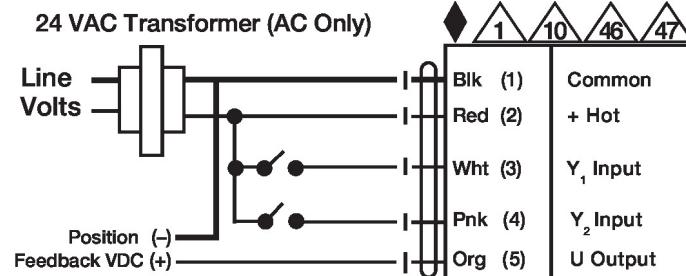

- Ⓐ Actuators with appliance cables are numbered.
- Ⓑ Provide overload protection and disconnect as required.
- Ⓒ Actuators may also be powered by DC 24 V.
- Ⓓ Two built-in auxiliary switches (2x SPDT), for end position indication, interlock control, fan startup, etc.
- Ⓔ Only connect common to negative (-) leg of control circuits.
- Ⓕ A 500 Ω resistor (ZG-R01) converts the 4...20 mA control signal to 2...10 V.
- Ⓖ Control signal may be pulsed from either the Hot (Source) or Common (Sink) 24 V line.
- Ⓗ IN4004 or IN4007 diode. (IN4007 supplied, Belimo part number 40155).
- Ⓘ For triac sink the Common connection from the actuator must be connected to the Hot connection of the controller. Position feedback cannot be used with a triac sink controller; the actuator internal common reference is not compatible.
- Ⓛ Actuators are provided with a numbered screw terminal strip instead of a cable.
- Ⓜ Actuators may be controlled in parallel. Current draw and input impedance must be observed.
- Ⓝ Master-Slave wiring required for piggy-back applications. Feedback from Master to control input(s) of Slave(s).
- Ⓓ Meets cULus requirements without the need of an electrical ground connection.
- ⚠ Warning! Live electrical components!
 - During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks.
 - Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.
- ⚠ Apply only AC line voltage or only UL-Class 2 voltage to the terminals of auxiliary switches. Mixed or combined operation of line voltage/safety extra low voltage is not allowed.
