

Rotary actuator for butterfly valves

- Torque motor 160 Nm
- Nominal voltage AC 24...240 V / DC 24...125 V
- Control modulating, communicative, hybrid
- With 2 integrated auxiliary switches
- Conversion of sensor signals
- Communication via BACnet MS/TP, Modbus RTU, Belimo-MP-Bus or conventional control

Picture may differ from product

Technical data		
Electrical data	Nominal voltage	AC 24240 V / DC 24125 V
	Nominal voltage frequency	50/60 Hz
	Nominal voltage range	AC 19.2264 V / DC 19.2137.5 V
	Power consumption in operation	20 W
	Power consumption in rest position	6 W
	Power consumption for wire sizing	with 24 V 20 VA / with 240 V 52 VA
	Auxiliary switch	2x SPDT, 1x 10° / 1x 090° (default setting 85°)
	Switching capacity auxiliary switch	1 mA3 A (0.5 A inductive), DC 5 VAC 250 V
	Connection protective earth	earth terminal
	Connection supply	Terminals 2.5 mm ²
	Connection control	Terminals 1.5 mm²
	Connection auxiliary switch	Terminals 2.5 mm ²
	Parallel operation	Yes (note the performance data)
Data bus communication	Communicative control	BACnet MS/TP Modbus RTU MP-Bus
	Number of nodes	BACnet / Modbus see interface description MP-Bus max. 8 (16)
Functional data	Torque motor	160 Nm (configured for D6200W/WL)
	Operating range Y	210 V
	Input impedance	100 kΩ
	Operating range Y variable	0.510 V 420 mA
	Position feedback U	210 V
	Position feedback U note	Max. 0.5 mA
	Position feedback U variable	0.510 V
	Position accuracy	±5%
	Manual override	hand crank
	Running time motor	35 s / 90°
	Running time motor variable	30120 s
	Sound power level, motor	68 dB(A)
	Position indication	Mechanical, integrated
Safety data	Protection class IEC/EN	I, protective earth (PE)
	Protection class UL	I, protective earth (PE)
	Degree of protection IEC/EN	IP66/67
	Degree of protection NEMA/UL	NEMA 4X
	Housing	UL Enclosure Type 4X

Technical data			
	Safety data	EMC	CE according to 2014/30/EU
		Low voltage directive	CE according to 2014/35/EU
		Certification IEC/EN	IEC/EN 60730-1 and IEC/EN 60730-2-14
		UL Approval	cULus according to UL60730-1A, UL60730-2-14 and CAN/CSA E60730-1 The UL marking on the actuator depends on the production site, the device is UL-compliant in any case
		Type of action	Type 1
		Rated impulse voltage supply	4 kV
		Rated impulse voltage control	0.8 kV
		Rated impulse voltage auxiliary switch	2.5 kV
		Pollution degree	3
		Ambient humidity	Max. 100% RH
		Ambient temperature	-3050°C [-22122°F]
		Storage temperature	-4080°C [-40176°F]
		Servicing	maintenance-free

Safety notes

Weight

Weight

This device has been designed for use in stationary heating, ventilation and air-conditioning
systems and must not be used outside the specified field of application, especially in aircraft
or in any other airborne means of transport.

5.8 kg

- · Caution: Mains voltage!
- The device has a protective earthing. Incorrect connection of the protective earth can lead to hazards due to electrical shock.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied with during installation.
- Apart from the wiring compartment, the device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- The device is not designed for applications where chemical influences (gases, fluids) are present or for utilisation in corrosive environments in general.
- The device contains electrical and electronic components and must not be disposed of as household refuse. All locally valid regulations and requirements must be observed.
- The two switches integrated in the actuator are to be operated either on mains voltage or on safety extra-low voltage. The combination mains voltage/safety extra-low voltage is not permitted.
- In case of maintenance work on the hydronic system, the correct valve position must be set
 via the control signal. Additionally, the actuator has to be disconnected from the power
 supply. The hand crank and manual override must not be used as a safety measure to
 maintain the set valve position.

Product features

Fields of application

The actuator is particularly suitable for utilisation in outdoor applications and is protected against the following weather conditions:

- UV radiation
- Dirt / Dust
- Rain / Snow
- Air humidity

Converter for sensors

Connection option for two sensors (passive, active or switching contacts). In this way, the analogue sensor signal can be easily digitised and transferred to the bus systems BACnet or Modbus.

Product features

Internal heating An internal heater prevents condensation buildup.

Thanks to the integrated temperature and humidity sensor, the built-in heater automatically

switches on/off.

Configurable device The factory settings cover the most common applications.

Parameters can be modified using Belimo Assistant 2, either wirelessly via Near Field

Communication (NFC), or via a wired connection.

Combination analogue - communicative

(hybrid mode)

With conventional control by means of an analogue control signal, BACnet or Modbus can be

used for the communicative position feedback

Simple direct mounting Simple direct mounting on the butterfly valve. The mounting orientation in relation to the

butterfly valve can be selected in 90° (angle) increments.

Manual override The valve can be manually operated using a hand crank. Unlocking is carried out manually by

removing the hand crank.

High functional reliability The actuator is overload protected, requires no limit switches and automatically stops when

the end stop is reached.

Flexible signalling The actuator has one auxiliary switch with a fixed setting (10°) and one adjustable auxiliary

switch (0...90°).

Electrical installation

Caution: Mains voltage!

Parallel connection of other actuators possible. Observe the performance data.

The wiring of the line for BACnet MS/TP / Modbus RTU is to be carried out in accordance with applicable RS-485 regulations.

AC 24...240 V / DC 24...125 V

Power supply must not be connected to the signal terminals!

Modulating control

Parallel circuit 2...10 V

Setpoint 2...10 V

Electrical installation

Parallel circuit 4...20 mA

Setpoint 2...10 V

Auxiliary switch

Further electrical installations

MP-Bus

MP-Bus Network topology

There are no restrictions for the network topology (star, ring, tree or mixed forms are permitted).
Supply and communication in one and the same 3-wire cable

- no shielding or twisting necessary
- no terminating resistors required

Functions with specific parameters (configuration necessary)

Control open/close

Further electrical installations

Functions with specific parameters (configuration necessary)

Control 3-point

Control 4...20 mA

Positioner SG..

Note

Maximum output power «DC 24 V out» 1.2 W @ 50 mA!
A separate isolating transformer must be used for higher performance!

Connection on the MP-Bus

Connection BACnet MS/TP / Modbus RTU

Further electrical installations

Functions with specific parameters (configuration necessary)

Connection BACnet MS/TP / Modbus RTU with analogue setpoint (hybrid mode)

Connection BACnet MS/TP / Modbus RTU with analogue primary/secondary operation

Sensor connection

Connection of active sensors (BACnet MS/TP / Modbus RTU)

Switching contact connection (BACnet MS/TP / Modbus RTU)

Possible input voltage range:

0...10 V

Resolution 5 mV

To capture for example:

- Active temperature sensors
- Flow sensors
- Pressure / differential pressure sensors

Switching contact requirements: The switching contact must be able to switch a current of 16 mA at 24 V accurately.

To capture for example:

- Flow monitors
- Operation / malfunction messages of chillers

Further electrical installations

Sensor connection

Connection of passive sensors (BACnet MS/TP / Modbus RTU)

1)	2)
500 Ω2 kΩ	+/-1%
2 kΩ10 kΩ	+/-2%
10 kΩ55 kΩ	+/-6%

- 1) Resistance range
- 2) Tolerance measured value Compensation of the measured value is recommended
- Suitable for Ni1000 and Pt1000
- Suitable Belimo types 01DT-..

Operating controls and indicators

5 Push-button and LED display green

Off: No power supply or malfunction

On: In operation

Press button: Triggers test run, followed by standard mode

6 Push-button and LED display yellow

Off: Standard mode
On: Test run active

Flickering: BACnet / Modbus communication active
Flashing: Request for addressing from MP client
Press button: Confirmation of the MP addressing

Auxiliary switch settings

Note: Perform settings on the actuator only in deenergised state.

For the auxiliary switch position settings, carry out points 1 to 4 successively.

1 Gear train disengagement

Opening the manual override cover and adjusting the hand crank. Manual override is possible.

2 Manual override

Turn the hand crank until the desired switching position **A** is indicated and then remove the hand crank.

3 Auxiliary switch

For the auxiliary switch position settings, carry out points 1

to 4 successively.

Opening the auxiliary switch adjustment cover and adjusting the hand crank. Turn the hand crank until the arrow points to the vertical line.

4 Terminals

Connect continuity tester to S4 + S5 or to S4 + S6.

If the auxiliary switch should switch in the opposite direction, rotate the hand crank by 180° .

Service

Using Belimo Assistant 2, device parameters can be modified. Belimo Assistant 2 can operate on a smartphone, tablet or PC. The available connection options vary depending on the hardware on which Belimo Assistant 2 is installed.

For more information about Belimo Assistant 2, refer to the Quick Guide – Belimo Assistant 2.

Wireless connection

Belimo devices marked with the NFC logo can be accessed either directly with an NFC-capable smartphone or with a Bluetooth-capable smartphone connected to Belimo Assistant Link.

Requirement:

- NFC- or Bluetooth-capable smartphone or tablet
- Belimo Assistant 2 (Google Play and Apple App Store)

Align the NFC-capable smartphone or Belimo Assistant Link with the device's NFC logo so that both NFC antennas are superposed.

Service

Wired connection

Belimo devices can be accessed by connecting Belimo Assistant Link to the USB port on a PC or laptop and to the Service Socket or MP-Bus wire on the device.

Belimo Assistant 2 acts as MP client. Therefore, no other MP client shall be connected to the device.
