

Positioners suitable for use with modulating damper actuators

- For control cabinet mounting

Picture may differ from product

## Technical data

<b>Electrical data</b>	Nominal voltage	AC/DC 24 V
	Nominal voltage frequency	50/60 Hz
	Nominal voltage range	AC 19.2...28.8 V / DC 19.2...28.8 V
	Power consumption in operation	0.3 W
	Power consumption for wire sizing	1 VA
	Output power note	for max. 10 actuators
	Connection supply / control	Terminals 4 mm <sup>2</sup>
	Electrical connection	Terminals
<b>Functional data</b>	Operating range Y	2...10 V
	Operating range Y note	Operating range selectable 0...10 V or 2...10 V
	Scale	0...100% (angle of rotation can be limited mechanically with rotary knob)
<b>Safety data</b>	Protection class IEC/EN	III, Safety Extra-Low Voltage (SELV)
	Degree of protection IEC/EN	IP20
	EMC	CE according to 2014/30/EU
	Type of action	Type 1
	Ambient humidity	Max. 95% RH, non-condensing
	Ambient temperature	-20...50°C [-4...122°F]
	Storage temperature	-40...80°C [-40...176°F]
	Servicing	maintenance-free
<b>Weight</b>	Weight	0.057 kg

## Safety notes

- The device must not be used outside the specified field of application, especially not in aircraft or in any other airborne means of transport.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied with during installation.
- The device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- The device contains electrical and electronic components and must not be disposed of as household refuse. All locally valid regulations and requirements must be observed.

## Product features

**Operating mode** The positioner is supplied with operating voltage via terminals 1 and 2. Proportionate to the position of the rotary knob, a control signal Y is generated which is either 2...10 V or 0...10 V, or a position change occurs at the actuator within the range of 0...100% (min...max).

**Application** The positioner is used for the (remote) control of modulating damper actuators or as a minimum positioner (lower limitation of output signals from modulating controllers). The adjustment range is 0...100% angle of rotation of the connected actuator.

**Simple direct mounting** The positioner is snapped onto a 35 mm DIN rail.

**Simple changeover** The switching from 2...10 V to 0.5...10 V is accomplished by means of a short connection between terminals 5 and 6.

## Electrical installation

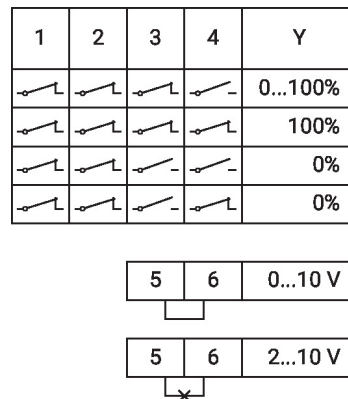

Supply from isolating transformer.
