

Communicative rotary actuator for ball valves

- Torque motor 20 Nm
- Nominal voltage AC/DC 24 V
- Control modulating, communicative 2...10 V variable
- Position feedback 2...10 V variable
- Communication via Belimo MP-Bus
- Conversion of sensor signals

Technical data

• PWIS/LABS-compliant according to VDMA 24364

Start point 0.5...8 V End point 2.5...10 V

with push-button, can be locked

manual (automatic on first power-up)

Electrical data	Nominal voltage	AC/DC 24 V
	Nominal voltage frequency	50/60 Hz
	Nominal voltage range	AC 19.228.8 V / DC 21.628.8 V
	Power consumption in operation	3.5 W
	Power consumption in rest position	1.25 W
	Power consumption for wire sizing	6 VA
	Connection supply / control	Cable 1 m, 4x 0.75 mm ²
	Parallel operation	Yes (note the performance data)
Data bus communication	Communicative control	MP-Bus
	Number of nodes	MP-Bus max. 8
Functional data	Torque motor	20 Nm
	Operating range Y	210 V
	Input impedance	100 kΩ
	Operating range Y variable	Start point 0.530 V End point 2.532 V
	Operating modes optional	Open/close
		3-point (AC only)
		Modulating (DC 032 V)
	Position feedback U	210 V
	Position feedback U note	Max. 0.5 mA

Safety notes

- This device has been designed for use in stationary heating, ventilation and air-conditioning systems and must not be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.
- Outdoor application: only possible in case that no (sea) water, snow, ice, insolation or aggressive gases interfere directly with the device and that it is ensured that the ambient conditions remain within the thresholds according to the data sheet at any time.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied with during installation.
- The switch for changing the direction of rotation may only be operated by authorised specialists. The direction of rotation must not in particular be reversed in a frost protection circuit
- The device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- · Cables must not be removed from the device.
- The device contains electrical and electronic components and must not be disposed of as household refuse. All locally valid regulations and requirements must be observed.
- PWIS/LABS-conformity is guaranteed as long as the packaging is unopened. Once the PWIS/ LABS-compliant packaging has been opened, the proper handling of the products is the responsibility of the customer. PWIS/LABS-conformity of unopened products is guaranteed for a period of one year after cleaning, provided they are handled properly, professionally and cleanly. Proof of proper, professional and clean handling is the responsibility of the purchaser. Ensure that the required cleanliness of the products is maintained. Do not touch the products with bare hands. Belimo accepts no liability for the consequences resulting from the contamination of a product caused by the customer.

Product features

Operating mode

Conventional operation:

The actuator is connected with a standard control signal of 0...10 V and drives to the position defined by the control signal. The measuring voltage U serves for the electrical display of the actuator position 0.5...100% and as control signal for other actuators.

Operation on Bus:

The actuator receives its digital control signal from the higher level controller via the MP-Bus and drives to the position defined. Connection U serves as communication interface and does not supply an analogue measuring voltage.

Converter for sensors

Connection option for a sensor (passive or active sensor or switching contact). The MP actuator serves as an analogue/digital converter for the transmission of the sensor signal via MP-Bus to the higher level system.

Parametrisable actuators

The factory settings cover the most common applications. Single parameters can be modified with Belimo Assistant 2 or ZTH EU.

Simple direct mounting

Straightforward direct mounting on the ball valve with only one central screw. The assembly tool is integrated in the plug-in position indication. The mounting orientation in relation to the ball valve can be selected in 90° steps.

Manual override

Manual override with push-button possible (the gear train is disengaged for as long as the button is pressed or remains locked).

Adjustable angle of rotation

Adjustable angle of rotation with mechanical end stops.

Home position

The first time the supply voltage is switched on, i.e. at the time of commissioning, the actuator carries out an adaptation, which is when the operating range and position feedback adjust themselves to the mechanical setting range.

The actuator then moves into the position defined by the control signal.

Factory setting: Y2 (counter-clockwise rotation).

Product features

Adaptation and synchronisation

An adaptation can be triggered manually by pressing the "Adaptation" button or with Belimo Assistant 2. Both mechanical end stops are detected during the adaptation (entire setting range).

Automatic synchronisation after pressing the manual override button is parametrised. The synchronisation is in the home position (0%).

The actuator then moves into the position defined by the control signal.

A range of settings can be made using Belimo Assistant 2.

Electrical installation

Supply from isolating transformer.

Parallel connection of other actuators possible. Observe the performance data. Direction of rotation switch is covered. Factory setting: Direction of rotation Y2.

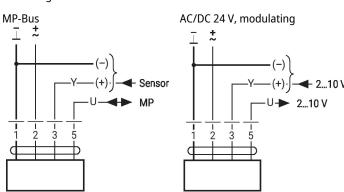

Wire colours:

1 = black

2 = red

3 = white

5 = orange

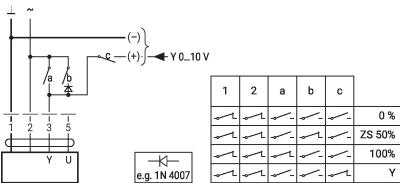

Further electrical installations

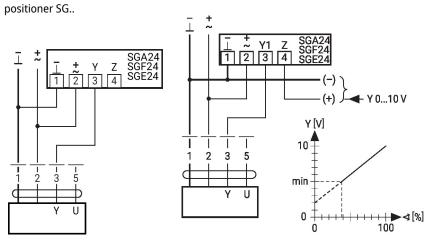

Functions with basic values (conventional mode)

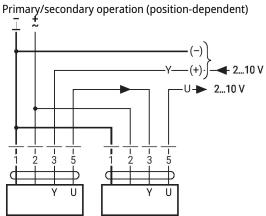

Override control with AC 24 V with relay contacts

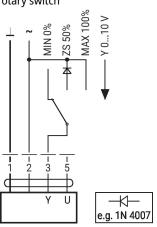

Control remotely 0...100% with

Minimum limit with positioner SG..

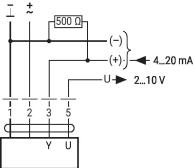

Override control with AC 24 V with rotary switch

Functions with basic values (conventional mode)

Control with 4...20 mA via external resistor

Functional check

- 1. Connect 24 V to connections 1 and 2
- 2. Disconnect connection 3:

Procedure

- with direction of rotation L:

Actuator rotates to the left

- with direction of rotation R:

Actuator rotates to the right

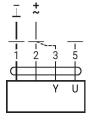

3. Short-circuit connections 2 and 3:

- Actuator runs in opposite direction

Caution:

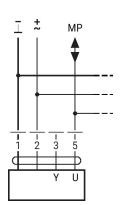

The operating range must be set to DC 2...10 V. The 500 Ohm resistor converts

the 4...20 mA current signal to a voltage signal DC 2...10 V.

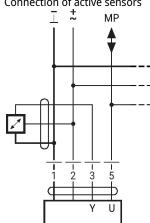

MP-Bus

Connection on the MP-Bus

Max. 8 MP-Bus nodes

Connection of active sensors

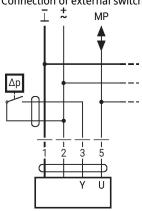

- Supply AC/DC 24 V
- Output signal 0...10 V (max. 0...32 V)
- Resolution 30 mV

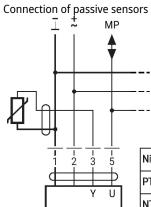

MP-Bus

Connection of external switching contact

- Switching current 16 mA @ 24
- Start point of the operating range must be parametrised on the MP actuator as ≥0.5 V

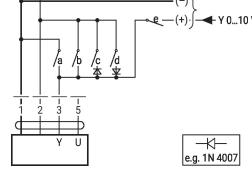

Ni1000	−28+98°C	8501600 Ω ²⁾		
PT1000	−35+155°C	8501600 Ω ²⁾		
NTC	-10+160°C 1)	200 Ω60 kΩ ²⁾		

- 1) Depending on the type
- 2) Resolution 1 Ohm Compensation of the measured value is recommended

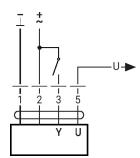

Functions with specific parameters (Parametrisation necessary)

Override control and limiting with AC 24 V with relay contacts

	⊸ L	⊸_L	-o	→	\ \	⊸_L		Open
	⊸\L	⊸_L	- - -	→ _	\ \	→	⊸_L	Υ

Control open/close

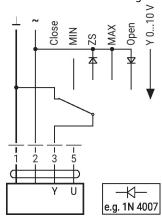

Further electrical installations

Functions with specific parameters (Parametrisation necessary)

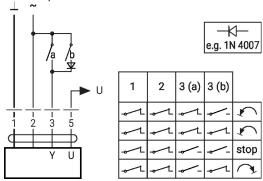

Override control and limiting with AC 24 V with rotary switch

Caution:

The "Close" function is only guaranteed if the start point of the operating range is defined as min. 0.5 V.

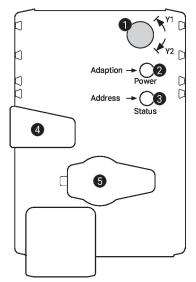

Position control: 90° = 100s Flow control: Vmax = 100s

Operating controls and indicators

Direction of rotation switch

Switch over: Direction of rotation changes

2 Push-button and LED display green

Off: No power supply or malfunction

On: In operation

Press button: Triggers angle of rotation adaptation, followed by standard mode

Push-button and LED display yellow

Off: Standard mode

On: Adaptation or synchronisation process active

Flickering: MP-Bus communication active

Flashing: Request for addressing from MP client

Press button: Confirmation of the addressing

Manual override button

Press button: Gear train disengages, motor stops, manual override possible

Release button: Gear train engages, standard mode

Service plug

For connecting parametrisation and service tools

Check power supply connection

2 Off and 3 On Possible wiring error in power supply

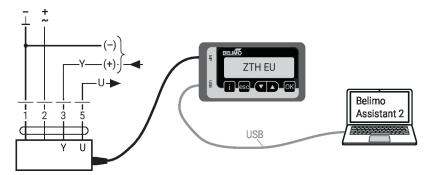

Service

Wired connection

The device can be parametrised by ZTH EU via the service socket.

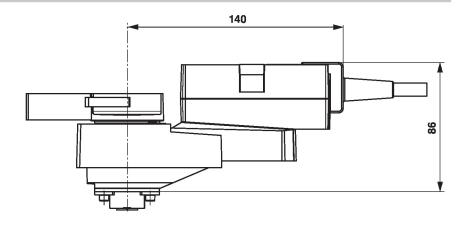

For an extended parametrisation, Belimo Assistant 2 can be connected.

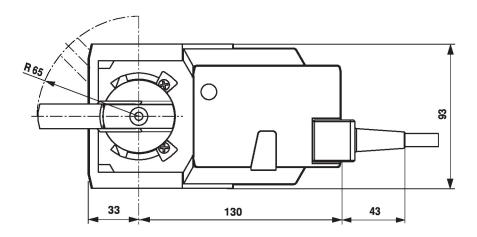

Connection ZTH EU / Belimo Assistant 2
