

Where to place?

Install your device in occupied space at 1.1-1.7m (3.6-5.6 ft) above the floor (away from doors, windows, air supply and zones where occupants may exhale directly into the sensor). Please make sure that your desired mounting location is close to a power source.

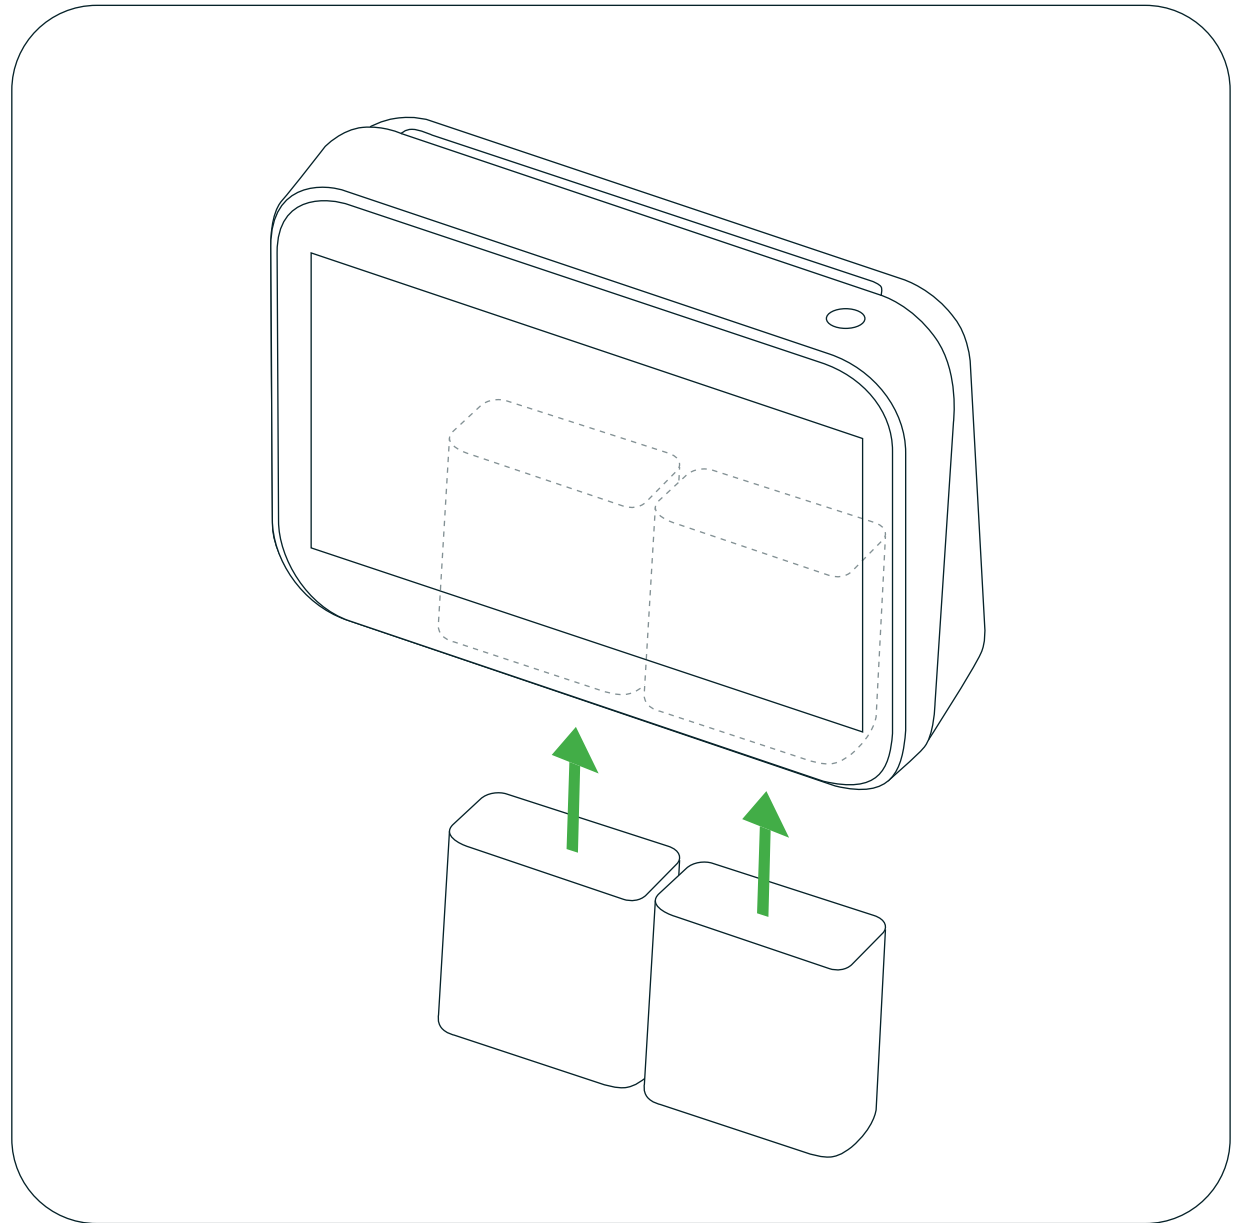

Step 1

Separate the
body from
the back shell.

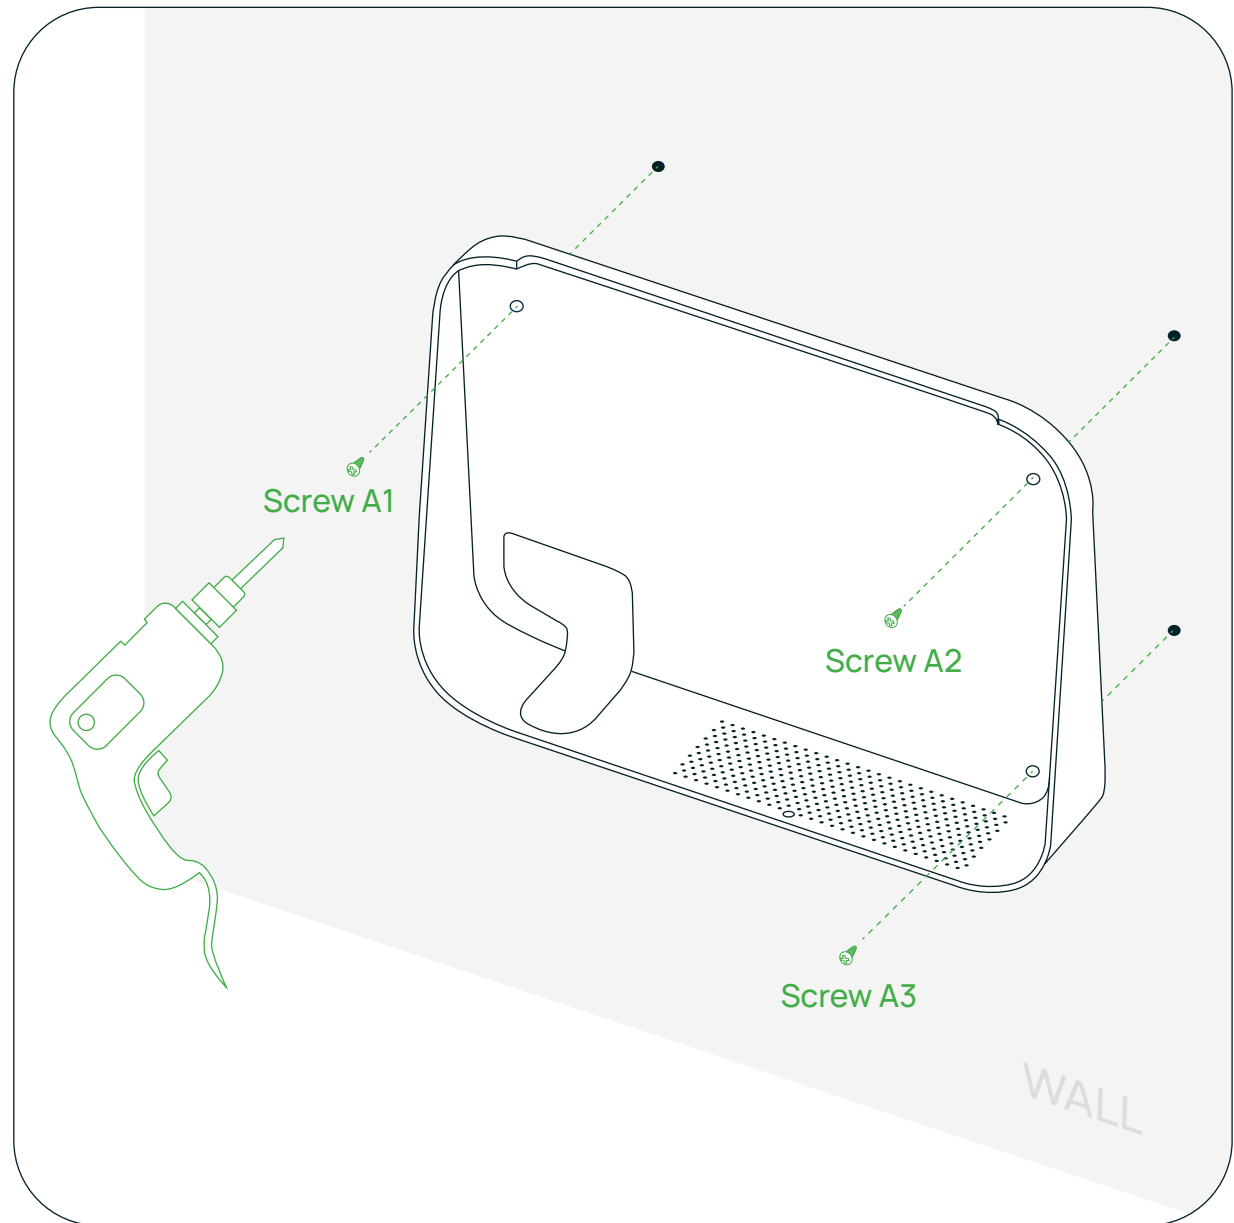

Step 2

Insert the
modules securely.

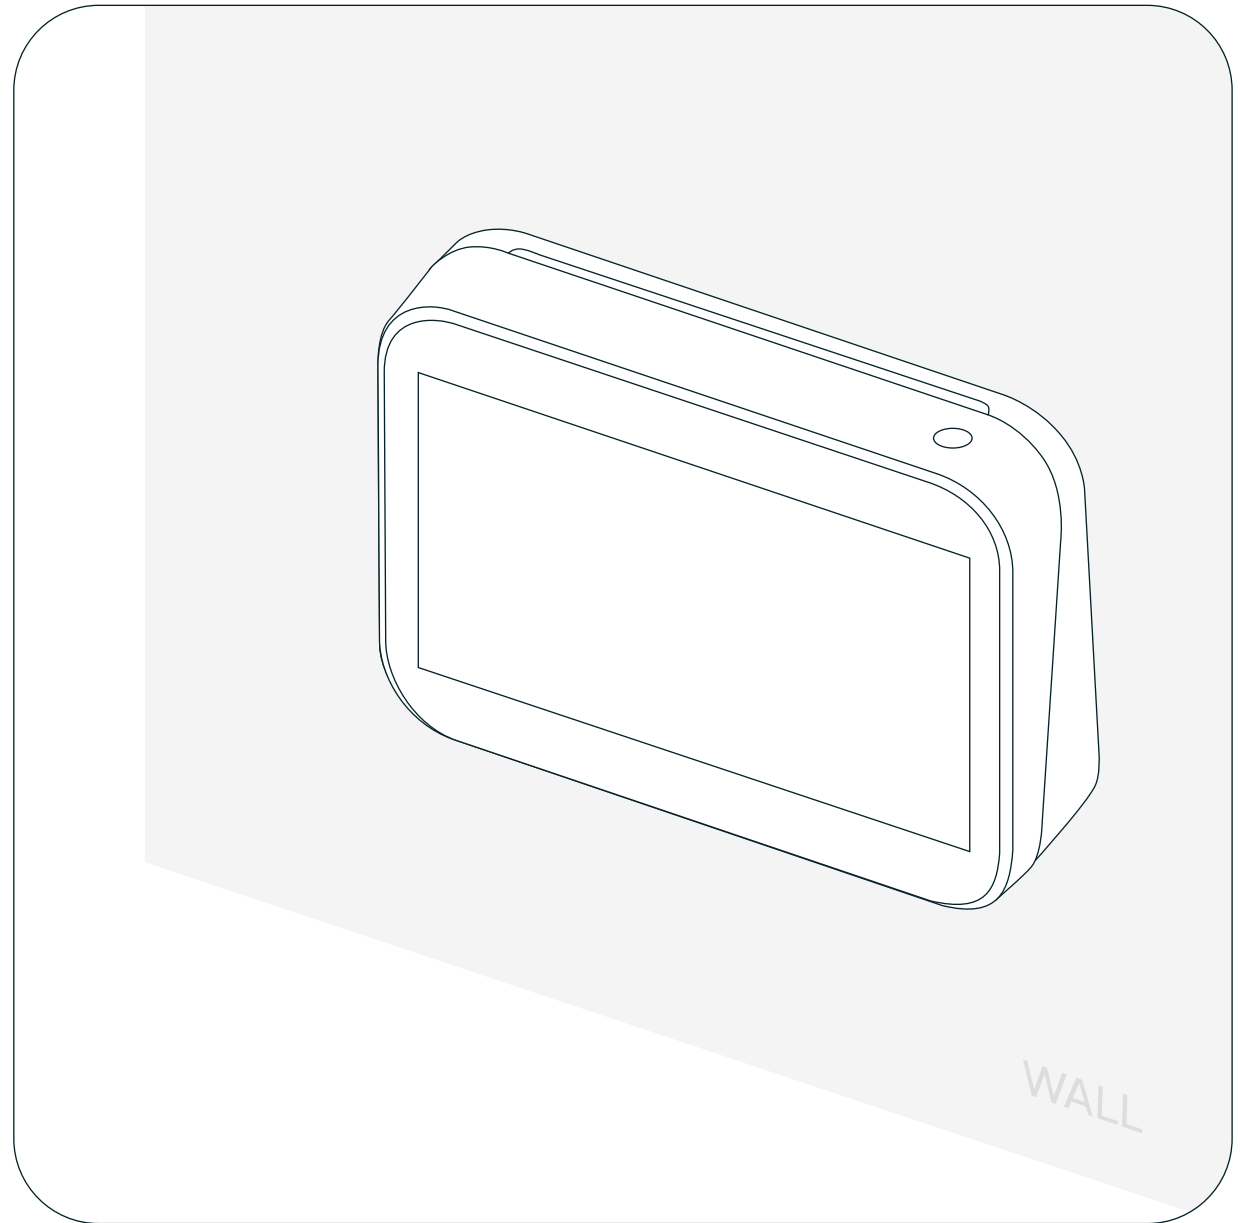

Step 3

Drill the holes and
secure the back
shell to the wall.

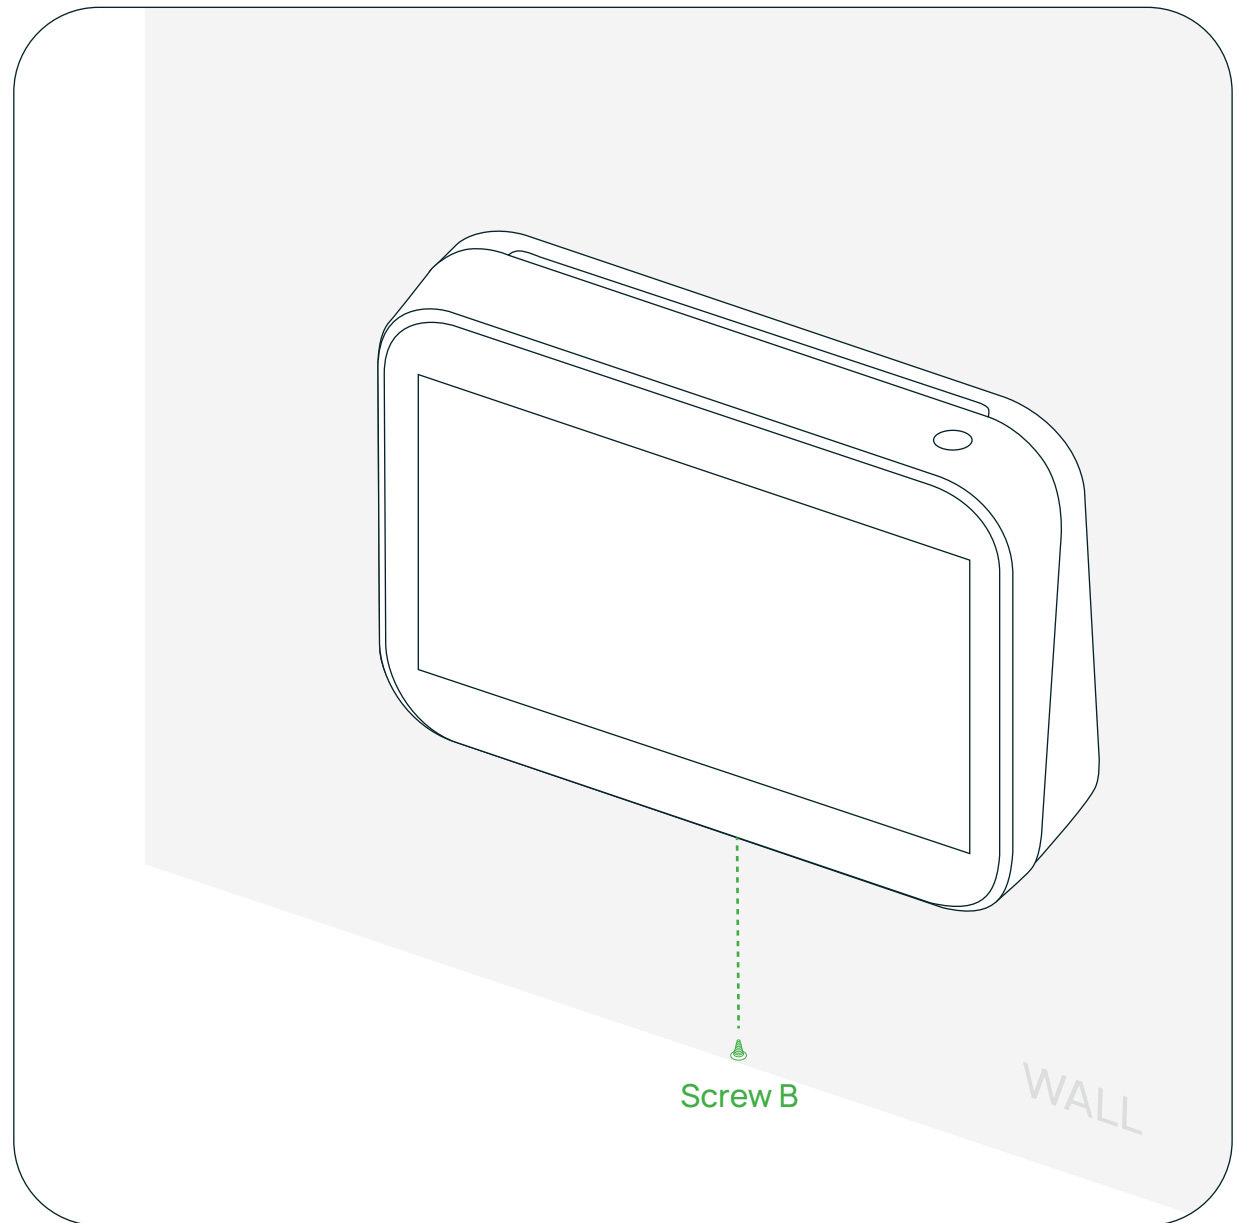

Step 4

Fit the product
on the wall.

Step 5

Use Screw B to
secure the unit to
the back shell.

Step 6

Plug in the cable,
turn on the
power and test.
